

HG "4 in 1 for leather"

IS A MODERN WATERBASED CARE AND MAINTENANCE AGENT
FOR FULLANILINE AND COLOURED LEATHER.

- APPLICATION

For full-aniline and all coloured leather (furniture, suitcases, handbags etc.). It is not however suitable for suede or nubuck leather.

- DIRECTIONS FOR USE

Please read the instructions carefully before using! First clean grubby leather and leather previously treated with other products well with HG "deep cleaner for leather". Allow cleaned surfaces to dry thoroughly (approx 30 minutes). Shake the bottle well before use! Dampen a sponge or clean, soft, lint-free cloth with HG "4 in 1 for leather". And gently rub in. Remove excess material immediately especially with full-aniline leather so that no marks from any over application are left. After approx. 10 minutes buff gently with a soft cloth. HG "4 in 1 for leather" ensures that dirt cannot attach itself and prevent the leather from drying out. It is then important to regularly treat both old and new leather (every 2 to 3 months, depending on the type of leather, use environmental influences etc.) In the meantime the leather can be best cleaned with a dry or slightly damp, lint-free cloth.

- ATTENTION

Not suitable for 'open' leather, such as suede and nubuck or leather where the top layer is entirely worn. If in doubt always test an inconspicuous area before hand: do not use if the area treated remains a dark colour after drying (approx. 30 minutes). Use a solvent (such as acetone) if necessary before removing stubborn dried stains attached to the finish layer such as ballpoint ink, felt-tip pen, nail varnish etc. In most cases this will however still effect the finish layer. Always therefore remove such staining as quickly as possible and use HG "4 in 1 for leather" or HG "water, oil, grease & dirt repellent for leather" to help prevent such stains in the future.

- PRODUCT INFORMATION

Density : ± 1,0 g/ ml
pH : 7,5 – 9.0

- PACKAGING : 6 x 250 ml

- PRECAUTIONS

S2- Keep out of the reach of children. **S46-** If swallowed, seek medical advice immediately and show this container or label. Keep in a frost free area.
