SHEET No.1248-FT

9605 - BAY WEST INSTANT SANITIZER + FOAM

DEFINITION

9605 - BAY WEST INSTANT SANITIZER + FOAM is a mint scented antiseptic lotion which turns into a foam when used. It is used for decontaminating the hands without the need for rinsing.

COMPOSITION

Preparation made from ethanol CAS No.64-17-5 (4.8% w/w), myristalkonium chloride CAS No.139-08-2 (0.3% w/w), chlorhexidine digluconate CAS No.18472-51-0 (0.12% w/w) and perfume.

TESTS

1. Organoleptic characteristics

- Aspect: colourless liquid
- Odour: mint

2. Physico-chemical characteristics (at 20℃)

- pH (direct): 4.5 6.5
- Viscosity (Brookfield at 20℃): < 30mPa.s

INSTRUCTIONS FOR USE:

Apply a dose of product. This will turn into a foam as it leaves the pump; rub the hands, wrists, forearms, between the fingers and around the nails for at least 30 seconds; do not rinse.

APPLICATION

General disinfection of the hands in communal environments
